Bothell, Washington 98011

Dear Mr. Timmerman:

I have attached a scale layout of the paved and unpaved areas of our plant. I have also included an overlay of the drainage pattern.

We are requesting your assistance in generating information acceptable to the Washington State Department of Ecology which shows the volume of surface runoff reaching our settling pond during a) 25 year, 24 hour, rain event (maximum volume) b) an annually averaged 24 hour runoff (average daily volume).

Please report your calculations in a sealed report for inclusion in our renewal application for a Waste Discharge Permit to WDOE. I will be happy to arrange a site visit after you have had the opportunity to review the attached. I can be reached at the above number to discuss this matter.

Sincerely,

Kenneth J. Rone, Jr.
Terminal Manager
